

Hegele Logistic goes to Asia Pacific!

In June 2010, Hegele Logistic, LLC had the opportunity to install a Linear Accelerator in Sydney, Australia. This was a very important step for us as this was our first job in the Asia Pacific zone.

The primary role of the Hegele team was handling the Linac installation and subsequently seven base frames for our client. Their secondary mission was to act as liaisons for our company to further strengthen the relationship with our customer and our service suppliers overseas who assisted with transport and rigging work of the system we were to eventually install.

As we asked the involved team members about their overall experience with this project, they stated that it was a great experience with perfect results due to fantastic cooperation with our local partners in Australia. Hegele Logistic is looking forward to expand the business platform in the Asia Pacific area.
